The subject property features a 2 story building in the rear that only has alley access from Parker Street and it is included on the same parcel according to the tax assessors records. This building was being used as 2 separate rental units by the current owner. However, the appraiser considered the value of the second building as contributory value because both buildings are included on the same parcel. The appraiser could not find any comparable sales with 2 buildings in the previous 12 month period in the subjects marketing area.

No survey or site plan was provided to the appraiser and none could be located by the appraiser. The site placement was obtained from the Bagley Maps, the site area was obtained from the Pulaski County Tax Assessors Records and the legal description was obtained from the Pulaski County Treasurers Office Records. Please note: The legal description and the Bagley Map does not match. This information is not warranted by the appraiser as accurate. The appraiser suggests that a survey be obtained to ascertain the exact information regarding the subject property.

As noted on page 1 of the URAR, it appears to the appraiser that the subject property may contain asbestos tile ceilings. The appraiser suggests that a licensed professional be obtained to determine this material. If this material is determined to be asbestos and the licensed professional determines that repairs or removal are needed and the cost exceeds \$500, the appraiser reserves the right to alter the final opinion of value.

At the time of the inspection, the appraiser noted settlement concerns with the subject property. The appraiser is not an inspector and suggests that a inspector be obtained to determine if damage exists due to these issues. If an inspector determines that damage does exist and the cost to cure the damages exceeds \$500, the appraiser reserves the right to alter the final opinion of value.

The zoning for the subject property is R-4 Multi-family District according to the City of North Little Rock Zoning Map (Please see attached Map). The definition of this zoning includes; multifamily or apartment residences, but allows single- and two-family structures. The subject property is in compliance with the current zoning. The highest and best use for the subject property is yet to be determined and is pending repair estimates. If the combined repairs for the subject property for the structure, environmental hazards and/or repairs needed to bring the subject property to code exceed \$20,000; it is the opinion of the appraiser that the highest and best use would be a new multifamily rental type structure.

According to the Pulaski County Tax Assessors Records, there is another previous sale for comparable sale #1 during the previous 12 month period: Date; 10/21/2008, Price; Unknown, Data Source; 2008072536. There is no other information available to the appraiser regarding this property.

According to the CARMLS, there have been 13 salos in the subjects marketing area during the previous 12 month period, and currently there are 29 active listings in the subjects marketing area. During the previous 36 month period, property values in the subjects marketing area have declined and longer than average marketing times have been noted.

Information regarding the closing, cancelled checks and receipts for improvements of the subject property were provided to the appraiser by the owner, the appraiser has no way to verify this information and does not warrant it as accurate. These items are included as addenda in this report. However, these items were not considered in the estimated opinion of market value for the subject property. According to the HUD statement provided to the appraiser by the owner, the contract sales price of the subject property was \$37,500.

Information regarding recent sales was also provided to the appraiser by the owner. There were 4 identified sales included, one of these was a duplex (1236 & 1238 West 10th Street), therefore, not considered comparable by the appraiser. Of the other 3, one could not be located in the Pulaski County Tax Assessors Records. The other 2; 1214 West 3rd Street and 300 Parker: the contract sales price given to the appraiser by the owner could not be verified in the Pulaski County Tax Assessors Records. Also, the Grantee listed by the Pulaski County Tax Assessors Records is the City of North Little Rock. Based on a possible assemblage factor, these were not used by the appraiser as applicable sales.

Much other data such as proposed improvements and a proposed multi-family apartment complex along with current active listings and previous appraisals by other firms was provided to the appraiser by the owner, this information was reviewed by the appraiser, however, it is not included in this report and it was not considered in the estimated opinion of market value for the subject property.

The reported analysis, opinions and conclusions were developed; and this report has been prepared in conformity with the requirements of the Code of Professional Ethics and Standards of Professional Practice of the Appraisal Institute; and the appraisar has the appropriate knowledge and experience required to comply with the competency provision of the USPAP.

We certify that the use of this report is subject to the requirements of the Appraisal Institute relating to review by its duly authorized representatives.

As of the date of this report, the signing appraisers have completed the requirements of the continuing education program of the Appraisal Institute and that required by the State of Arkansas. We certify that we have the necessary real estate related training and experience relevant to properties such as the subject property.

Neither all nor any part of the contents of this report, especially any conclusions as to value, the identity of the appraisers, or the firm with which they are connected, or any reference to the Appraisal Institute or the MAI or SRA designations, shall be disseminated to the public through media, sales media, or any other public means of communication without prior written consent and approval of the signed appraisers.

Physical depreciation is based on the estimated effective age of the subject property. Functional and/or external depreciation, if present, is specifically addressed in the appraisal report or other addenda. In estimating the site value, the appraiser has relied on personal knowledge of the local market. This knowledge is based on prior and/or current analysis of site sales and/or abstraction of site values from sales of improved properties. The subject property is located in an area of primarily owner-occupied single family residences and the Income Approach is not considered to be meaningful. For this reason, the Income Approach was not used. The Estimated Market Rent and Gross Rent Multiplier utilized in the Income Approach are based on the appraiser's knowledge of the subject market area. The rental knowledge is based on prior and/or current rental rate surveys of residential properties. The Gross Rent Multiplier is based on prior and/or current analysis of prices and market rates for residential properties. For income producing properties, actual rents, vacancies and expenses have been reported and analyzed. DEFINITION OF MARKET VALUE: The most probable price which a property should bring in a competitive and open market under all conditions requisite to a fair sale, the buyer and seller, each acting prudently, knowledgeably and assuraing the price is not affected by undue stimulus. Implicit in this definition is the consummation of a sale as of a specified date and the passing of title from seller to buyer under conditions whereby: (1) buyer and seller are typically motivated; (2) both parties are well informed or well advised, and each acting in what he considers his own best interest; (3) a reasonable time is allowed for exposure in the open market; (4) payment is made in terms of cash in U.S. dollars or in terms of linancial arrangements comparable thereto; and (5) the price represents the normal consideration for the property sold unaffected by special or creative financing or sales concessions* granted by anyone associated with the sale.

* Adjustments to the comparables must be made for special or creative financing or sales concessions. No adjustments are necessary for those costs which are normally paid by sellers as a result of tradition or law in a market area; these costs are readily identifiable since the seller pays these costs in virtually all sales transactions. Special or creative financing adjustments can be made to the comparable property by comparisons to financing terms offered by a third party institutional lender that is not already involved in the property or transaction. Any adjustment should not be calculated on a mechanical dollar for dollar cost of the financing or concession but the dollar amount of any adjustment should approximate the market's reaction to the financing or concessions based on the appraiser's judgement.

STATEMENT OF LIMITING CONDITIONS AND APPRAISER'S CERTIFICATION

CONTINGENT AND LIMITING CONDITIONS: The appraiser's certification that appears in the appraisal report is subject to the following conditions:

- 1. The appraiser will not be responsible for matters of a legal nature that affect either the property being appraised or the title to it. The appraiser assumes that the title is good and marketable and, therefore, will not render any opinions about the title. The property is appraised on the basis of it being under responsible ownership.
- 2. The appraiser has provided a sketch in the appraisal report to show approximate dimensions of the improvements and the sketch is included only to assist the reader of the report in visualizing the property and understanding the appraiser's determination of its size.
- 3. The appraiser has examined the available flood maps that are provided by the Federal Emergency Management Agency (or other data sources) and has noted in the appraisal report whether the subject site is located in an identified Special Flood Hazard Area. Decause the appraiser is not a surveyor, he or she makes no guarantees, express or implied, regarding this determination.
- 4. The appraisar will not give testimony or appear in court because he or she made an appraisal of the property in question, unless specific arrangements to do so have been made beforehand.
- 5. The appraiser has estimated the value of the land in the cost approach at its highest and best use and the improvements at their contributory value. These separate valuations of the land and improvements must not be used in conjunction with any other appraisal and are invalid if they are so used.

The appraiser has noted in the appraisal report any adverse conditions (such as, needed repairs, depreciation, the presence of hazardous wastes, toxic substances, etc.) observed during the inspection of the subject property or that he or she became aware of during the normal research involved in performing the appraisal. Unless otherwise stated in the appraisal report, the appraiser has no knowledge of any hidden or unapparent conditions of the property or adverse environmental conditions (including the presence of hazardous wastes, toxic substances, etc.) that would make the property more or less valuable, and has assumed that there are no such conditions and makes no guarantees or warranties, express or implied, regarding the condition of the property. The appraiser will not be responsible for any such conditions that do exist or for any engineering or testing that might be required to discover whether such conditions exist. Because the appraiser is not an expert in the field of environmental hazards, the appraisal report must not be considered as an environmental assessment of the property.

The appraiser does not assume responsibility for the accuracy of such items that were furnished by other parties.

- 9. The appraiser has based his or her appraisal report and valuation conclusion for an appraisal that is subject to satisfactory completion, repairs, or alterations on the assumption that completion of the improvements will be performed in a workmanlike manner.
- 10. The appraiser must provide his or her prior written consent before the lender/client specified in the appraisal report can distribute the appraisal report (including conclusions about the property value, the appraiser's identity and professional designations, and references to any professional appraisal organizations or the firm with which the appraiser is associated) to anyone other than the borrower; the mortgage or its successors and assigns; the mortgage insurer; consultants; professional appraisal organizations; any state or federally approved financial institution; or any department, agency, or instrumentality of the United States or any state or the District of Columbia; except that the lender/client may distribute the property description section of the report only to data collection or reporting service(s) without having to obtain the appraiser's prior written consent.
